

# Breakout Session #1

4:15PM – 5:15PM

60 Minutes

# Web Breakout Topic 1: Patients and PRO Data

## Discussion Questions

### How can patients be engaged in PRO data collection?

- What platforms work best for data collection from patients?
  - Consider how to optimize data accuracy and completeness;
  - Consider how to avoid disruption to clinic flow
- How can data be shared directly with patients? How can the meaning of the data best be communicated
- What is most important to patients? What data should be captured?

### Ethical Issues:

- What are the specific ethical barriers to use of PROs for clinical and research purposes?
- How can those ethical barriers be addressed?

### What are the

- Barriers?
- Facilitators?
- Recommendations for PCORI?
- Partnerships that could advance the agenda?

Please submit your  
comments using the  
“Ask a Question”  
feature

# Submit Your Recommendation(s)

During each breakout, web participants can provide input on the breakout questions using the “**Ask a Question**” feature. In-person participants will be using the framework below to capture their thoughts and recommendations. Please feel free to use this framework to collect and/or organize your thoughts.

Web results will be discussed during Breakout 3 – including a moderated session from 11:15am to 12:45pm EST on Day 2.

|                             | Recommendation 1 | Recommendation 2 | Recommendation 3 |
|-----------------------------|------------------|------------------|------------------|
| Recommendation Description  |                  |                  |                  |
| Barriers                    |                  |                  |                  |
| Facilitators                |                  |                  |                  |
| Opportunities for the Field |                  |                  |                  |
| Opportunities for PCORI     |                  |                  |                  |
| Partnerships Indicated      |                  |                  |                  |

# Breakout Session #2

9:00AM – 10:00AM

60 Minutes

# Web Breakout Topic 2: Clinical Use of PRO Data

## Discussion Questions

- How can PRO measures be integrated into the clinical workflow?
- What are current barriers to collection and integration of PRO data and what can we learn from successful models?
- How can PRO data be presented to clinicians to facilitate their usefulness and use?
- What are facilitators of clinician use?
- What stakeholders are involved in enhancing clinician interest in use of PRO data?

What are the

- Barriers?
- Facilitators?
- Recommendations for PCORI?
- Partnerships that could advance the agenda?

| Barriers                    |                  |                  |                  |
| Facilitators                |                  |                  |                  |
| Opportunities for the Field |                  |                  |                  |
| Opportunities for PCORI     |                  |                  |                  |
| Partnerships Indicated      |                  |                  |                  |

# Breakout Session #3

11:15AM – 12:45PM

90 Minutes

# Web Breakout Topic 3: Research and Quality Measurement Uses for the Data

## Discussion Questions

- How can PRO data collected for clinical practice be made useful for research and quality performance management?
- How can data pooling needs be addressed at the measure selection stage?
- How can the need for multiple PROs be coordinated?
  - Consider patients with multiple chronic conditions
  - Consider all points of contact with health system

What are the

- Barriers?
- Facilitators?
- Recommendations for PCORI?
- Partnerships that could advance the agenda?
